PROFESSIONAL SUMMARY

Data Science and Python Full-Stack Developer with hands-on experience in Machine Learning, Deep Learning, Natural Language Processing (NLP) and data analysis. Skilled in building and evaluating ML and DL models, data preprocessing, feature engineering, and developing AI-driven applications using Python, Django, and FastAPI.

EDUCATION

SCMS School of Engineering and Technology (SSET)

APJ Abdul Kalam Technological University (KTU), Kerala

- Master of Computer Applications (MCA)

Ernakulam, Kerala

Sep 2024 – May 2026

College of Applied Science (CAS)

University of Calicut, Kerala

- B.Sc Computer Science

Malappuram, Kerala

Oct 2020 – Mar 2023

EXPERIENCE

Data Science Intern

Luminar Technolab

- Worked on real-world data science projects using Python, NumPy, Pandas, and SQL
- Built machine learning models and created data visualizations using Power BI
- Performed data cleaning, preprocessing, and feature engineering to improve model performance
- Applied Deep Learning and NLP techniques for text analysis and predictive modeling tasks

Jul 2023 – Mar 2024

Ernakulam, Kerala

Python - Django Full-Stack Intern

Innakes Infotech Pvt Ltd

- Developed full-stack web applications using Python and Django
- Worked with HTML, CSS, JavaScript, and Django templates to build responsive user interfaces
- Integrated relational databases and performed CRUD operations for data-driven features
- Collaborated on debugging, testing, and deploying Django-based applications

Aug 2022 – Feb 2023

Kochi, Kerala

PROJECTS

AI-Based Stress Detection and Counselling System | Python, NLP, CNN, ML, FastAPI

Dec 2025 – Mar 2026

- Developed a multimodal AI system for mental health counselling using text, facial emotion, voice, and behaviour analysis
- Implemented NLP-based counselling chatbot and CNN models for facial emotion and voice stress detection
- Applied supervised machine learning to analyse behavioural patterns and predict stress risk levels
- Combined multi-source analysis to generate stress severity scores and personalized recommendations

Hostel Management System | Python, Django, HTML, CSS, JavaScript, SQLite

Aug 2025 – Oct 2025

- Developed a full-stack hostel management system using Django for student and warden operations
- Implemented attendance tracking, leave requests, complaints, and room cleaning workflows
- Automated hostel and mess fee calculation with notifications and admin approvals

Doctor Appointment Web Application | React.js, Firebase, Node.js

Dec 2022 – Mar 2023

- Developed a full-stack web application for managing doctor appointment booking and scheduling
- Implemented real-time data storage and authentication using Firebase
- Built responsive user interfaces using React.js for patients and administrators
- Integrated backend logic to handle appointment creation, updates, and availability management

TECHNICAL SKILLS

Languages: Java, Python, C, php, Android, JavaScript, HTML, CSS

Frameworks: React, FastAPI, Django

Data Science & AI: Machine Learning, Deep Learning, NLP, CNN, Data Analysis

Visualization Tools: Power BI

Databases: SQLite, PostgreSQL, MongoDB

Developer Tools: Git, Docker, Google Colab, VS Code, Jupyter Notebook, PyCharm

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, OpenCV
